Project Design Phase-II Solution Requirements (Functional & Non-functional)

| Date | 03 October 2022 |
|---------------|------------------------------------|
| Team ID | PNT2022TMID03044 |
| Project Name | Project – Personal expense tracker |
| Maximum Marks | 4 Marks |

Functional Requirements:

Following are the functional requirements of the proposed solution.

| Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task) |
|-------------------------------|--|
| Register | Registration is the process of the user to complete the |
| | application's form. Certain details must be submitted such as |
| | e-mail address, password, and password confirmation. The |
| | user is identified using these details. |
| Login | The login screen is used to verify the identity of the user. The |
| | account can be accessed using the user's registered email |
| | address and password. |
| Categories | On the main page, we can see overall revenue and spending, |
| | as well as the balance remaining after expenditure, as well as |
| | the user's entire categories namely Entertainment, Cloth, Food |
| | and Drinks, Health and Fitness and so on. |
| Update Daily Expensive | The user can upload the daily expensive details what they are |
| | spending on each day. The details such as cloth, |
| | entertainment, food, health etc., |
| View Expensive Chart | This module used to see a pictorial depiction of all |
| | details in the form of a pie chart, where each slice of the pie |
| | chart represents that the viewer to gain an approximate |
| | notion of which category has the highest expenses. |
| Set Alert | When a user attempts to spend more than the pre- |
| | defined amount limit, the app will automatically send an alert |
| | if the threshold amount they selected for an alert is exceeded. |
| Notification | A feature of the application called push notifications |
| | lets the administrator or developer send a personalized tip of |
| | money management to all of the app's users. |
| | Register Login Categories Update Daily Expensive View Expensive Chart Set Alert |

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description |
|--------|----------------------------|---|
| NFR-1 | Usability | The system shall allow the users to access the |
| | | system with pc using web application. The system uses a |
| | | web application as an interface. The system is user |
| | | friendly which makes the system easy. |
| NFR-2 | Security | A security requirement is a statement of needed security |
| | | functionality that ensures one of many different security |
| | | properties of software is being satisfied. |
| NFR-3 | Reliability | The system has to be 100% reliable due to the |
| | | importance of data and the damages that can be caused |
| | | by incorrect or incomplete data. The system will run 7 |
| | | days a week. 24 hours a day. |
| NFR-4 | Performance | The information is refreshed depending upon |
| | | whether some updates have occurred or not in the |
| | | application. The system shall respond to the member in |
| | | not less than two seconds from the time of the request |
| | | submittal. The system shall be allowed to take more time |
| | | when doing large processing jobs. Responses to view |
| | | information shall take no longer than 5 seconds to appear |
| | | on the screen. |
| NFR-5 | Availability | The system is available 100% for the user and is |
| | | used 24 hrs a day and 365 days a year. The system shall |
| | | be operational 24 hours a day and 7 days a week. |
| NFR-6 | Scalability | Scalability is the measure of a system's ability to |
| | | increase or decrease in performance and cost in response |
| | | to changes in application and system processing demands. |
